Steven Garfinkel
Director, Information Security
Oversight Office (Z)
General Services Administration
18th & F Streets, N.W.
Washington, DC 20405

Dear Mr. Garfinkel:

This is in response to your letter of 23 September 1985 concerning a recommendation from the Department of Army that the Information Security Oversight Office (ISOO) issue cover packets for classified micrographic transparencies as standard forms for Government-wide use. As explained below, standard envelopes for microfiche are available and in use by the Intelligence Community.

A Micrographics Working Group was established by the Director of Central Intelligence (DCI) Intelligence Information Handling Committee (IHC) to develop uniform microfiche standards for intelligence information among members of the Intelligence Community. A representative from the Department of Army participated in the Micrographics Working Group.

Enclosed is a copy of the Working Group report, Standards for Microfiche Copies of Intelligence Documents, which was published in April 1983 and included standards for microfiche envelopes for classified information, collateral as well as compartmented. The envelopes serve as an alert to the fact that the microfiche contained therein is classified and, if appropriate, identifies special handling controls. If the envelopes developed by the Working Group no longer meet the needs of the Department of Army, you may wish to refer them to the Intelligence Information Handling Committee.

As a service to the Community, this Agency supplies the envelopes upon request. If the Department of Army wishes to obtain a supply of standard envelopes, they may do so by contacting:

Mr. Harry E. Fitzwater
Deputy Director for Administration
Central Intelligence Agency
Washington, DC 20505

Dear Mr. Fitzwater:

In July 1985 we received a letter from the Office of the Assistant Chief of Staff for Intelligence, Department of the Army, recommending that the Information Security Oversight Office (ISOO) issue cover packets for classified micrographic transparencies as standard forms for Government-wide use. The Department of the Army, European Division, currently uses these forms to reduce the likelihood of compromise of classified micrographic transparencies and to make them more easily recognizable as classified.

The ISOO makes the initial determination on whether to standardize a security form on the basis of wide applicability and use. Before we decide to act on the Department of the Army's request, we need to know whether other agencies dealing heavily in classified information have a need and use for these types of forms. We enclose the three Army cover packets. Please distribute these to the appropriate officials in your agency with a request that they communicate their views to us either in writing or by telephone no later than October 28, 1985. Calls should be directed either to Ethel R. Theis or Laura Kimberly at 535-7251.

Sincerely,

A handwritten signature in cursive script, appearing to read 'Steven Garfinkel'.

STEVEN GARFINKEL
Director
